## Full Stack Web Developer

I am eager, able and available to contribute to the constantly evolving technology industry. I have a roll-up your sleeves attitude that is driven by my results oriented mindset. Experience and ingenuity is what I bring to every challenge. My mission is to find a team that needs an individual who is able to effectively manage large scale projects and apply targeted solutions.

### Professional Experience

#### CommonLit.org

08/2015 - 02/2016

Is an ed-tech startup that empowers underprivileged youth access to high quality educational resources at no cost. I worked with a close knit team that utilized people for their strengths in an agile work environment. While there I crafted a local API that served 140,000 records enabling the company to collect geographical information about their user base. I integrated an assemblage of technologies that drastically improved content creation capacity, as well as spearheaded a campaign to optimize user experience in the site.

*Technologies Utilized:* Ruby on Rails, JQuery, Javascript, Heroku, PostgreSQL, AWS, Devise, Mandrill, ActiveAdmin & TinyMCE

#### Vance & Engles Aircraft Brokers

CTO

I have been a member of the brokerage team for over two years, during that time I have contributed from start to finish to seven aircraft transactions. I also constructed a database of over 20,000 email addresses of other brokers and end users. Vance & Engles inspired me to go into Web Development after seeing continued success with our revamped online presence.

### Education

#### General Assembly

01/2015 - 09/2015

Is a software development vocational school, while there I was taught by industry professionals from companies such as Vox Media, WeddingWire & LearnZillion. I started at GA with their Part-Time Back End Web Development Course. After completing that course I was still hungry for more and enrolled in their Web Development Immersive program. The WDI program goes over a full breadth of libraries and frameworks that currently shape our developmental landscape.

*Portfolio:* Hip.Tips - Angular & Firebase

OnlineAircraft - Rails, Jquery & Heroku

MyStox - Express & D3

#### High Point University

Graduation Year - 2014

B.S., in Business Administration

Minors in Political Science, Economics and Finance

### Technical Experience

#### Languages

Ruby

Javascript

#### Frameworks & Libraries

Ruby on Rails

Angular JS

Backbone JS

Node JS

JQuery

D3

#### Methodologies

MVC

Test Driven Development

Object-Oriented-Programming

No-SQL Structure
